

Subject: Exclusive Chromebook Offer for FSD Families as You Evaluate Your Options

Dear Families,

We understand that many of you are considering purchasing a device for your student to use at school in September. As you weigh your options, FSD is pleased to present an additional choice for your consideration.

Through a special arrangement with our vendor, PC Corp, we are offering FSD families the opportunity to purchase rugged Chromebooks at the same price we pay through the provincial purchasing agreement.

An Option to Weigh Alongside Others

Please note that this offer is entirely optional. There is no obligation for you to purchase through PC Corp; it is simply one of several avenues you might consider as you look for the right device for your student. We recognize the importance of choice when it comes to your student's educational needs. Any device purchased through PC Corp will be entirely under the ownership of the students, granting them the autonomy to manage their devices independently, it will not be managed or maintained by FSD.

Consistent WIFI Access for All Devices

Rest assured that every Chromebook or other device your student brings to school, regardless of the point of purchase, will seamlessly connect to our school's Guest WIFI network, providing your student with stable internet access.

Exploring This Opportunity

Should you wish to explore this opportunity further to compare pricing and specifications, please contact PC Corp at CalgaryAdmin@pccorp.com. They are prepared to assist you with detailed information, facilitate the ordering process, and discuss the convenient delivery or pickup options available.

We are hopeful that this offer will be a valuable addition to your considerations.

Best wishes,
