AI to develop numeracy assessments

I am a grade ___ teacher in Alberta. As a school, we have been working on improving fluency and flexibility in math to improve our students basic facts understanding and computation skills. One of our guiding resources is Figuring out FIuency in Mathematics, Teaching and Learning. We have also been using the resources from Pearson Mathology. Create me a quick pencil paper assessment I can give my students 3-4 times per year to measure their growth in the areas of number fluency and flexibility over time. Ensure the assessment is aligned to the Alberta Curriculum for grade ___ mathematics in the strand of number.
