

RISK AND MATERIALS MANAGEMENT

May 14 2025

WELCOME TO OUR FLOURISHING LEARNING COMMUNITY!

At FSD, we think about the whole system to make sure our mission, vision, and purpose are visible in every decision we make. This systems-thinking approach is key to achieving the goals set out within our divisional and school education plans. By frequently reflecting on our progress, we are demonstrating accountability and providing our partners in education the assurance that education is at the centre of a flourishing community.

SUCCESS

- Growing a positive health and safety culture at FSD
- Establishing relationships with 3rd party service providers.
- Discounted classroom furniture purchase.

SUPPORT

- Working with the JWHSC to shape our safety culture.
- Engaging with our risk managed insurance consortium to create an approved list of Field Trip locations.
- Working with key vendors to take advantage of purchasing opportunities.

ENGAGEMENT

- Engaging staff in operations day safety activities.
- Reviewing data from previous inspections and initiating corrective actions.
- Implementing best practice from our insurers to continue to drive our premiums down.

Your Input Matters?

We continue to improve:

- By completing incident and hazard reports.
- By informing others of the hazards.
- By asking ourselves is there something I can do to prevent an injury.

Change

The phrase "We've always done it this way" can be a barrier to safety improvements and innovation. It often reflects resistance to change and can hinder efforts to implement safer practices or new technologies. Instead of relying on past practices, a proactive approach to safety requires continuous evaluation and adaptation to changing circumstances.

ABOUT US
